

## CONTENTS

### Opening Lecture

Dr. J. G. Leach	Standardization and Electrical Safety	9
-----------------	---------------------------------------	---

### SESSION I

Chairman: Dr. J.G. Leach

D. Koritnik, D. Glušič	Novelties that IEC 60269-6 brings into test laboratories	18
K. Cwidak	The comparison of thermal properties of test rig, fuse-holder and switch-disconnector-fuse	27
J. L. Gelet, T. Hayashi	Cumulative-ageing approach for determination of the life-duration of fuses in case of multi-levels cycles	32
S. Averianova, N. Akatnov, E. Tonkonogov	Post – arc behaviour in HV outdoor expulsion fuses	40
R. Wilkins	Robust Fuse Design	45
V. Seefeld, P. Brogl	Fuse Recycling in Germany supports research and education in the field of electrical power distribution	53

### International Fuse standardization and Testing

### SESSION II

Chairman: Volker Seefeld

Craig Rice, S. Cheong, Nigel Nurse	A study of challenges for fuse link protection in the new generations of environmentally friendly vehicles	61
A. Ehrhardt, S. Schreiter, M. Rock	Requirements on fuses in the trigger circuits of spark-gap-based arresters	70
J. C. Gómez, D. H. Tourn	gPV fuse: special characteristics for Photovoltaic cells protection	79
N. Henze, P. Funtan	Fault currents and protection techniques in photovoltaic systems	88
J. Wang, Z. Liu	Vacuum type high voltage fuse for external protection of shunt capacitors	97

### The Application of Fuses

## Opening lecture of the day

M. Koprivšek Varistor fuse or fuse with integrated varistor 103

## SESSION III

### The Application of Fuses

Chairman: P. Brogl

J. Pihler, M. Stegne, P. Kitak, A. Glotić, B. Fluher, I. Tičar, J. Voršič Fuse application in medium voltage switchgear 109

M. Hausmann, N. Graß The influence of current frequencies up to 1.000 Hz on power dissipation and time-current characteristics of NH fuse-links 119

B. Pesan Use of low-voltage fuse-links in switch units like fuse – impact on power dissipation and possible mishaps at overload and short-circuit current breaking 128

B. Česnik, Z. Nedoh Insulated HV fuse holder with voltage indication 135

C.S. Psomopoulos, G.C. Ioannidis, Y. Karras Evaluation of the contribution in electricity losses caused by the higher rated voltage of NV/NH fuselinks in the Greek low voltage distribution network 143

J. C. Gómez, E. Florena Selection of fuses for bare overhead conductors' protection 154

## Opening lecture of the day

R. Wilkins Review of Fuse Modelling Methods 164

## SESSION IV

### Technology, Design and Manufacture Review of Fuse Operation and Modelling

Chairman: dr. R. Wilkins

A. Plesca LABVIEW application to control a new type of high breaking capacity fuse 181

M. Darr, R. Douglas, V. Saporita New solutions for overcurrent protective device discrimination requirements 189

H. Schau, H. Bessei The influence of fuses on arcing fault energy and personal protective clothing required 197

M. Bizjak, M. Koprivšek, M. Strehar, V. Martinčič Dissolution of fuse element notches by SnCu solder and the temperature rise of fuse element 209

A. Hamler, S. Gril, J. P. Cukovic Thermal analysis and temperature calculation for the NV melting fuse 218

N. P. M. Nurse Present and future requirements for the protection of Photovoltaic systems 225

The logo for ICEFA (International Conference on Electrical Fuses and Their Applications) features the letters 'ICEFA' in a bold, yellow, sans-serif font. The letters are contained within a green rectangular border with a black outline. The background of the entire cover is a vibrant, abstract graphic with a color gradient from yellow to red to blue, overlaid with a grid of glowing, curved lines that suggest a technical or electrical theme.

**ICEFA**

**2011**

**9th INTERNATIONAL CONFERENCE  
ON ELECTRICAL FUSES AND THEIR APPLICATIONS**

**STANDARDIZATION AND ELECTRICAL SAFETY**

**Dr. John G. Leach**
